Melanie- I think it would focus specifically on the MM2A issues- using the permit that was circulated- and others we can identify- as examples of what is not acceptable- e.g., no blanket prohibitions on HAPs- building on what we have said and what the courts have said about syn limits for NSR sources. I can definitely do a call- but I have asked for \$ to actually be in person. My management supports me conducting webinars for states and regions on this topic- and this would be a great chance to get feedback from APMs.

Hi Terri. We were just discussing the draft agenda for the June APM meeting and were wondering if we could add your topic on the June APM agenda rather than the APM conference call agenda? Are you free to call in to the meeting? We are tentatively planning for your topic around 10:30 am EST on June 13th. If this is ok with you, I would like to know a little more detail about your topic. Specifically if your concerns are more related to MM2A issues or more as a general stand-alone issue? If you have any specific examples or information related to any on-going enforcement case(s) that would help highlight the issues you are seeing, we think it might be good to pass that along to the group.

Thanks in advance, Melanie

Melanie- How about examples of permit terms intended to ensure synthetic minor permit status that AED doesn't think are enforceable as a practical matter.

OK- a bit controversial right now- so maybe only if you need agenda items?
